## Abstract

[Team Overview] [Past Research] [Research Plan]

## 1 Team Overview

Provide an overview of your team, describing the main research topics of the team, besides NLP for RE (e.g., product lines, formal methods). This section should give the reader an idea of what is the core background of your research environment, and how NLP for RE is integrated in this background.

## 2 Past Research on NLP for RE

Describe the past research of your team on NLP for RE, referring previously published papers, possibly in chronological order. This section should give the reader an idea of what is your specific expertise in the field of NLP for RE, according to your research history. You can also include the description of the *software tools* that the team may have developed, possibly with a download link. This section is not mandatory. If you only recently started working on NLP for RE, or you plan to start, you can skip this section.

## 3 Research Plan on NLP for RE

Describe what you plan to do, based on your past research, current interests, or current trends. You can also describe a specific project on NLP for RE that you are currently following, or you plan to start soon.
